

ABSTRACT OF THE DISCLOSURE

$\{f_{\alpha}^{(1)}\}$ and $\{f_{\alpha}^{(2)}\}$ are the first and second order terms in the expansion of f_{α} in powers of ϵ . The functions $f_{\alpha}^{(1)}$ and $f_{\alpha}^{(2)}$ are determined by the boundary conditions $f_{\alpha} = 0$ at $\alpha = 0$ and $\alpha = 1$. The functions $f_{\alpha}^{(1)}$ and $f_{\alpha}^{(2)}$ are also determined by the requirement that they satisfy the boundary conditions $f_{\alpha} = 0$ at $\alpha = 0$ and $\alpha = 1$. The functions $f_{\alpha}^{(1)}$ and $f_{\alpha}^{(2)}$ are also determined by the requirement that they satisfy the boundary conditions $f_{\alpha} = 0$ at $\alpha = 0$ and $\alpha = 1$.
